MANAGEMENT DISCUSSION & ANALYSIS

Industry structure and development

Your company operates in the Antifriction bearing industry which is segmented into ball bearings and roller bearings (Tapered, Cylindrical, Needle, Spherical, Thrust and other special application bearings). The major user industries of antifriction bearings are automobiles, general engineering, railways, electrical equipment etc. The production of the organized bearing industry as represented under Ball & Roller Bearing Manufacturers Association (BRBMA) is placed at Rs. 4300 crores during the last financial year. The market segmentation of demand is approximately 65% from original equipment manufacturers (OEM) and the balance coming from the replacement market/exports.

The automotive industry is the largest consumer of bearing products. In FY 2011-12 sales of the overall Indian automobile sector has increased by 15%, a much lower rate compared to the growth of 30% in the previous year. Particularly affected were passenger car sales that have registered de-growth since July 2011 compared with the previous year. Sales of two wheeler and commercial vehicles have shown buoyancy. India continues to be one of the fastest growing automotive markets in the world and the outlook for the current year continues to be favourable. Even with GDP growth estimates at a conservative 7% for the current year, the opportunities for industrial development remain very positive in India and the demand for bearing products is expected to maintain the present momentum.

Economic Environment

Continued growth in industrial production and rising disposable income of the expanding middle class households, is expected to result in double digit growth for the automotive sector. The continued capacity expansion by major OEMs, in line with market demand is expected to encourage auto component manufacturers to invest in new capacities and expand operations. Opportunities for exports are expected to increase both for finished automobiles as well as auto components. Many new launches are also planned during the year which will help in expanding the size of the market.

Interest rates are expected to moderate during the course of the year though higher fuel prices and inflationary pressures within the economy could put pressure on costs and margins for bearing manufacturers.

Your company will continue to focus on offering value added solutions and leverage its competitive strength to match customer growth plans.

Opportunities and Threats

Rapid industrialization and economic growth is expected to result in increasing demand for personal transportation. Growing prosperity in rural areas will also positively influence demand for motor cycles as well as agricultural tractors in India. Thus the long term outlook on the Indian economy remains very positive.

Infrastructure development continues to be a priority for the Indian Government. Similarly public and private investment programmes have been finalized in core sectors like steel, cement, power and renewable energy. All these factors are expected to result in increased demand for ball and roller bearings.

The domestic bearing industry is facing the following threats :

- a. The menace of spurious bearings continues to adversely affect the industry inspite of concerted efforts by the industry to control the same.

- b. Domestic inflation is disturbing – rising input costs including employee costs are likely to affect competitiveness. With bearing steel prices on an uptrend it is likely that there will be pressure on costs and margins for the Indian manufacturers.
- c. Dumping of cheap bearings by Chinese and other South East Asian countries.

The industry and your company are taking all steps to improve competitiveness by reducing costs, improving quality and spreading awareness about the threat from fake products of inferior quality.

Financials

The company has made a profit after tax of Rs. 446.51 Lakhs as compared to Rs. 381.71 Lakhs in the previous accounting year. The net sales at Rs. 2052.77 Lakhs show an increase of 16.5% as compared to net sales of the previous year.

The company will continue to enhance volumes to improve capacity utilization, reduce costs, improve efficiencies, broad base its customer profile and develop new part numbers so that the financial results can be improved during the current financial year.

Risks and risk mitigation

The company's internal control processes cover, amongst others processes for identification, assessment and mitigation of various kinds of risks which include operational and financial risks. Such risks are regularly reviewed and discussed. The macro concerns which could significantly impact industry performance during the year are inflation, fiscal deficit, high interest rates, government's inability to build and expand critical infrastructure and the adverse impact of the FTAs which have resulted in higher imports of auto components and could therefore negatively impact the industry's plans to achieve the targeted size of US\$ 40 billion by 2016 under the Automotive Mission Plan.

Company's internal auditors review the internal controls, risk assessment and mitigation procedures, independently as part of their internal audit process and their observations and findings are presented, reviewed and discussed in the audit committee meeting.

The Plant head of the operating unit, with continuing interactions and communications with the marketing head of the holding company, employees and other stakeholders keeps himself abreast with the developments in the market, products, competition and other areas.

Internal control systems and adequacy

The company has in place adequate internal control systems which ensures reliable financial reporting, safeguarding of assets, adherence to management policies and promotion of ethical conduct. The company has implemented an integrated ERP system which will help the company in its growth process and make it more responsive to changes in the business environment and processes.

Some of the significant features of the internal control systems are:

- a. Internal auditors who in addition to transaction audit cover operational audit and review business processes and performance
- b. Standard operating procedures and guidelines are being reviewed in the light of the ERP implementation to ensure tighter controls, including recommendations to strengthen business processes. Improvements/modifications are being effected to meet with changes in business conditions, statutory and accounting requirements.

The Audit Committee closely interacts with and guides management and alongwith statutory auditors and internal auditors reviews significant findings and follows up thereon.

Segmentwise Performance

During the current year also, the company has manufactured special purpose machines and tools for the bearing industry which has resulted in a better utilization of assets and other resources of the company. Accordingly while ball and roller bearings remain the primary business segment, the results of the Special purpose machine segment are also reported as some of the assets and liabilities of the company were expended towards this business segment. The details of the segment performance are tabled below:

26 Additional information to the financial statements:

(a) Contingent liabilities not provided for :

(i) The Company had received an Order dated 6th September, 2004 from the Employees Provident Fund Organisation raising a demand of Rs. 161.36 Lakhs including interest of Rs. 46.73 Lakhs for default in making payment of Employees Provident Fund and allied dues for the period April, 1986 to February, 2003. The Company has been making contributions to the 'SNL Officers Provident Fund Trust' and 'SNL Employee's Provident Fund Trust', being Trusts formed by the Company in earlier years; these Trusts have net assets of Rs. 92.82 Lakhs and Rs. 51.29 Lakhs respectively as at 31st March, 2011 as reflected in their audited balance sheets. As per the order, the existence of the said Trusts and the act of switching over from Employees trust to the Officers trust on salary exceeding the statutory limit fixed by the Employees Provident Fund and Miscellaneous Act, 1952, have been considered violative of the Act. The authorities had attached one of the company's bank accounts and had recovered an amount of Rs. 2.75 Lakhs in an earlier year. The company has contested the above demand and on a writ petition filed by the company in the High Court of Jharkhand, Ranchi, the High Court has directed the authorities not to take coercive steps till the disposal of the petition. The Company denies all the allegations made against it since the company had made the necessary applications to grant exemption to the Trusts which was neither granted nor rejected in spite of several reminders from time to time. In view of the facts of the case, the company does not expect any liability in this regard.

(ii) Provident fund and other matters in respect of workers: Rs. 5.05 Lakhs, (as at 31.03.2011: Rs. 5.05 Lakhs)

(b) There are no amounts due to the suppliers covered under Micro, Small and Medium Enterprises Development Act, 2006; this information takes into account only those suppliers who have responded to the enquiries made by the Company for this purpose. The auditors have relied on the representation made by the management.
